EUROPEAN REFERENCE NETWORK ON RARE METABOLIC DISEASES

MetabERN is the first comprehensive,
pan-metabolic and pan-European
patient-orientated platform. It aims to
transform the care provided to **patients** with
inherited metabolic diseases (IMDs) in Europe

European
Reference
Network

MetabERN

European Reference Network
for Hereditary Metabolic Disorders

WHAT IS METABERN

MetabERN represents

69 founding Healthcare Providers (HCPs)

from **18** European Member States and **44 patient organisations**

MetabERN is endorsed by the Society for the Inborn Errors of Metabolism (SSIEM)

OUR MISSION

Is to generate a patient centered European Reference Network for hereditary metabolic disorders able to identify and bring the best expertise to facilitate prevention, diagnosis, management, research, and access to therapy to **patients** affected by rare IMDs.

OUR AIMS

Link expertise for IMD patients

Harmonise data collection

Develop harmonised guidelines

Stimulate cross-border research and innovative treatments

Develop training and education programmes

OUR VISION

Set up a growing network of health care providers and experts centres in Europe in which all inherited metabolic diseases (IMDs) are equally important- even the rarest.

Our team strives to achieve excellence in every aspect of our network, from supporting **diagnostics** to **education** and **research**.

We stay flexible to best serve both the metabolic community and **patients** with IMDs.
