Q1

Is this training seems interesting to you?

Responses obtained: 73

Unknown questions: 0

Response choice	Responses	
Yes	87,67%	64
No	12,33%	9
Total		73

Comments:

1. Multidisciplinary approach is a key tool
2. Yes I think it is a good idea to see every aspects of management and the patient perspective
3. The training is interesting but not for my clinical involvement at this point
4. Any multidisciplinary training around metabolic patients can be interesting
5. It is our job
6. It is a fundamental step to move forward when dealing with still untreatable diseases, but whose patients' QoI is improving and survival is getting longer

Q3

In your opinion, what is the main target of this training?

Responses obtained: 47 Unknown questions: 26

Response choice	Responses	
Medical students	10,64%	5
Nurses	0%	0
Patients associations	4,26%	2
General practitioner	6,38%	3
Comments	78,72%	37
Total		47

Comments:

1. This should be happening routinely in all the major metabolic centres, I do not see this as new or even innovative learning
2. Theoretically the target could be all these professionals, however, it depends on the programme
3. Including paediatricians in their education and their teachers as well!
4. It is unclear what is the training program about, difficult to answer
5. Patients and general practitioner
6. Integrated work of trainers with different backgrounds is necessary for successful training
