

**Transition from childhood to adulthood in inherited metabolic diseases**  
**SSIEM-MetabERN collaboration**  
**Second webinar**

**23th, May 2019**

**PROGRAMME**

---

**2:30 pm Introduction**

*14h30 Pr. François Eyskens, CEMA-Centrum Erfelijke Metabole Aandoeningen  
CBAA-Centrum Bevolkingsonderzoek voor Aangeboren Aandoeningen Antwerpen*

**2:40 pm 1st topic:**

Transitional care for adolescents and young adults with an inherited metabolic disease: protocol used in CEMA Antwerp

**Elien RAETS**, clinical psychologist, coordinator of the transition in the Center of Inherited Metabolic Diseases CEMA UZA

*The presentation is about the startup of the transitional care in CEMA Antwerp, pitfalls and results, followed by the new and improved program/protocol that we are starting up early 2019, inspired by elements from literature and previous experiences.*

**3:10 pm 2nd topic:**

Opportunities and practical problems encountered in the transition from pediatric to adult care: everything from independent adults to multidisciplinary care for adults in childrens bodies and minds.

**Dr. Ann VERHAEGEN**, internal medicine-endocrinology-affiliated with the Center of Inherited Metabolic Diseases CEMA UZA

*The transition as organised in the Antwerp University Hospital, the opportunities and pitfalls in the organisation and the problems we encountered in the multidisciplinary care of patients with high medical or psychosocial demands in an adult ambulatory and hospitalisation care.*

**3:40 pm Conclusion and Discussion**

*Pr. François Eyskens, CEMA-Centrum Erfelijke Metabole Aandoeningen  
CBAA-Centrum Bevolkingsonderzoek voor Aangeboren Aandoeningen Antwerpen*
