MetabERN

European Reference Network
for Hereditary Metabolic Disorders

Are you dealing with a
**Rare Hereditary Metabolic
Disease?**

This is for YOU

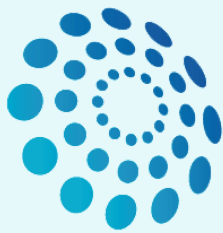

<https://metab.ern-net.eu>

If you struggle with a rare inherited metabolic disease (IMD), it is most likely a diagnosis was difficult. You may feel isolated and without access to the best information, care and treatment.

MetabERN was created to address **YOUR** issues and needs

What is MetabERN?

MetabERN is a European network of healthcare providers and patient groups that work together to:

- Accelerate diagnosis
- Facilitate access to the best available information, care and treatment
- Improve the quality of the life of patients and their families

What can MetabERN do for YOU?

Cross-border Medical Care

You can have access to the **best expertise, care and treatment** across Europe. Through the CPMS*, you and your metabolic specialist(s) can become an informed and empowered team to find the best solutions for your needs.

Connect with Patient Organisations

Patient organisations provide knowledge on conditions and experts in the field, and support opportunities for collaboration in areas such as research and advocacy.

Research

You can gain better information about **clinical trials** (and other research projects) across Europe.

Capacity-buiding

You can get reliable, accessible and up-to-date **information**. **Training** on relevant topics can also be made available to you.

*The Clinical Patient Management System is a virtual system that enables healthcare professionals to share patient cases and collaborate with other colleagues across Europe providing better diagnosis, care and treatment.
